EDUCATION

Baruch College/CUNY, Zicklin School of Business

Bachelor's in Computer Information Systems (BBA)

New York, NY

Expected December 2027

Minor: Computer Science

GPA: 3.50 / 4.00

Relevant Coursework: Programming and Computational Thinking, Object-Oriented Programming, Service Operations Management, Fundamentals of Management, Database Management Systems, Cybersecurity

TECHNICAL SKILLS

-
- **Languages:** English (native), conversational in Haitian Creole
 - **Soft Skills:** Communication, Teamwork, Time management, Problem-solving, and Adaptability
 - **Technical Skills:** Microsoft Office Suite (Excel, Word, PowerPoint), Python, C++, SQL, Data Normalization, Entity-Relationship (ER) Modeling, Relational Database Management Systems, Power Query, Data Transformation, Predictive Financial Modeling, Multiple Linear Regression, and Advanced Excel Dashboards, Tableau.

WORK EXPERIENCE & ACADEMIC PROJECTS

NYC Tech Talent Pipeline Residency

June 2026 - Present

Apprenticeship - Data Analytics - Manhattan, NY

- Engineered end-to-end data pipelines and executed Exploratory Data Analysis (EDA) using Python and SQL to clean complex datasets and perform statistical modeling.
- Developed interactive data visualizations and executive dashboards to translate technical findings into actionable, data-backed business recommendations.
- Collaborated within agile project teams on capstone projects, including building operational optimization databases and predictive insights platforms to solve real-world challenges.

Digital Marketing and Social Media Intern

June 2022 – August 2022

Lishawn's Consulting - Virtual Business and Finance - Brooklyn, NY

- Identified key audience engagement drivers across digital platforms, improving marketing strategy effectiveness and increasing client brand presence by 35%.
- Developed and executed strategic content plans by tracking audience trends and identifying growth opportunities to increase client engagement and interaction.
- Collaborated with cross-functional teams to align data-driven marketing efforts with the firm's core mission of providing strategic solutions and best-practice advice.

Financial Data Analyst Project - NVIDIA Performance & Macroeconomic Modeling

June 2026

- Sourced and merged nine years of NVIDIA financial fundamentals with US macroeconomic indicators using Power Query to build a centralized analytical dataset.
- Designed an interactive Excel dashboard with dynamic pivot charts and a conditionally formatted correlation matrix to visualize economic impacts on company margins.
- Executed multiple linear regression analyses to identify stock price drivers and developed a predictive model forecasting valuations under varying interest rates.

Lead Database Developer - Pet Shelter Management Project

February - May 2026

- Engineered a relational database system using SQL to transition a local animal rescue organization from disparate manual spreadsheets to a centralized platform.
- Constructed Entity-Relationship (ER) models and executed data normalization up to the Third Normal Form (3NF) to structure complex relationships across animal medical records, adoptions, and staff scheduling.
- Formulated SQL SELECT queries to extract actionable business insights regarding volunteer availability and donation management, directly supporting daily operational efficiency.
